**CERTIFICATE COURSE
IN**

HYDROPONICS

**Organised by
Department of BOTANY**

2023

Government Degree College, Rajampeta

Critical Analysis Report for Certificate Course

Name of the Department:

BOTANY

Title of the Certificate:

HYDROPONICS

1.Objectives of the certificate Course:

- * Learn to grow plants commercially in Hydroponics
- * Learning about the equipment and materials used in both amateur and professional hydroponics.
- * Discover the nature and scope of this industry and the career and business opportunities it offers.
- * Develop networking resources, business and technical skills, building a foundation for success in the hydroponic industry.

2.Short summary of the Work:

Hydroponics farming in India is in its rising stage. Now-a-days in India, the progressively thinking farmers are adopting this innovative and inventive farming technique. Here, the plants are totally depending upon the artificially created system. Some success stories of hydroponics farming can be considered as the confidence booster of any grower who is willing to set up this innovative hydroponic system. In near future, there will be shortage for agricultural land and this technology becomes an alternative solution to cop up the food problem.

3.Problems faced while running the Certificate Course:

1. Investment for equipment is a limiting factor.
2. Scientific knowledge is essential.
3. knowledge of Micronutrients and Macronutrients is essential

4. Outcomes of the Certificate Course:

1. To provide a sound basis of knowledge in horticultural principles as they apply to the culture, use and management of plants in various production situations.
- 2.To provide new and existing employees who are unable to undertake on campus training with the opportunity to gain appropriate knowledge inn the field of plant culture, use and management.
3. To prepare employees for supervisory and managerial positions in the field of plant culture, use and management.
4. To provide horticultural business owner/operators (or those contemplating ownership) with appropriate training to apply technical skills to the management of the physical, financial and human resources in which they have made, or will make, a substantial investment.
5. To provide an understanding of modern technology and its application to growing plants, with emphasis being placed on hydroponics production of commercially valuable plants.
- 6.This course will build a very broad knowledge, awareness and understanding of hydroponics. As a graduate, you will be well placed to understand and see opportunities in a much better way than you could before commencing the course.

Government Degree College, Rajampeta

Critical Analysis Report for Certificate Course

Name of the Department:

BOTANY

Title of the Certificate:

HYDROPONICS

1.Objectives of the certificate Course:

- * Learn to grow plants commercially in Hydroponics
- * Learning about the equipment and materials used in both amateur and professional hydroponics.
- * Discover the nature and scope of this industry and the career and business opportunities it offers.
- * Develop networking resources, business and technical skills, building a foundation for success in the hydroponic industry.

2.Short summery of the Work:

Hydroponics farming in India is in its rising stage. Now-a-days in India, the progressively thinking farmers are adopting this innovative and inventive farming technique. Here, the plants are totally depending upon the artificially created system. Some success stories of hydroponics farming can be considered as the confidence booster of any grower who is willing to set up this innovative hydroponic system. In near future, there will be shortage for agricultural land and this technology becomes an alternative solution to cop up the food problem.

3.Problems faced while running the Certificate Course:

1. Investment for equipment is a limiting factor.
2. Scientific knowledge is essential.
3. knowledge of Micronutrients and Macronutrients is essential

4. Outcomes of the Certificate Course:

1. To provide a sound basis of knowledge in horticultural principles as they apply to the culture, use and management of plants in various production situations.
- 2.To provide new and existing employees who are unable to undertake on campus training with the opportunity to gain appropriate knowledge inn the field of plant culture, use and management.
3. To prepare employees for supervisory and managerial positions in the field of plant culture, use and management.
4. To provide horticultural business owner/operators (or those contemplating ownership) with appropriate training to apply technical skills to the management of the physical, financial and human resources in which they have made, or will make, a substantial investment.
5. To provide an understanding of modern technology and its application to growing plants, with emphasis being placed on hydroponics production of commercially valuable plants.
- 6.This course will build a very broad knowledge, awareness and understanding of hydroponics. As a graduate, you will be well placed to understand and see opportunities in a much better way than you could before commencing the course.

7. This is an industry with huge potential. It is difficult for anyone to predict what your best opportunities might be, upon finishing your studies. The one thing that is certain is that they will be greater than before you started.

5. Were outcomes Satisfactory: Students are satisfactory and much impressed about the course. Reasons are:

1. In future, there will be a great shortage for agricultural land as the population is increasing.
2. As there is shortage of the agricultural land, this technology becomes an alternate solution for Food production i.e, Leafy and fruit vegetables.
3. Open places and roof tops of houses can be used to grow plants through this Technology

6. If not, suggestions need to improve:

Proposal for
CERTIFICATE COURSE IN HYDROPONICS
(Art of Growing Soil less Plants)

Preface

Hydroponics is a type of Horticulture and a part of hydroculture, which implies growing plants without soil where mineral nutrient solutions in a water solvent are used. Hydroponics is a Greek term, made from two words - Hydro means water and Ponos means labor. Thus "working water" is the true meaning.

From the ancient time, plants are being grown in soil where the plants happen to get all the necessary nutrients, minerals and water from the soil. Every plant needs different type of soil for its growth. Some heavy water requiring plants need clay soil, some need sandy soil where standing water can get easily drained out. Even some plants want loamy soil which is neither water holding nor water draining. Therefore, this demand automatically restricts the diversification of cultivation i.e. only limited amount and limited type of crop can be produced in an area. So, the situation where this varietal need of soil type can be eliminated even without compromising on the crop's need of nutrients, minerals water etc. can be described as Hydroponics.

Hydroponics farming in India is in its rising stage. Now-a-days, in India, the progressively thinking farmers are adopting this innovative and inventive farming technique. Here the plants are totally depending upon the artificially created system. Some success stories of hydroponics farming can be considered as the confidence booster of any grower who is willing to set up this innovative hydroponic system

Minutes of BOS in Botany

The Botany BOS meeting with the teaching faculty members of department Government Degree College, Rajampeta has been conducted in the department on 25.10.2023 to discuss the following agenda.

1. To approve the proposal of certificate course in Hydroponics
2. To frame the syllabus for certificate course in HYDROPONICS.
3. To decide the time duration for the course
- 4 To decide the eligibility criteria
5. To decide Fee particulars
6. To nominate the course coordinator

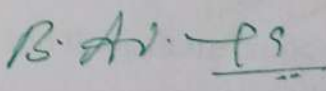

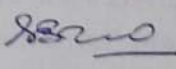

The BOS Meeting has unanimously resolved the following issues:

Resolution:

- The BOS members approved the proposal unanimously.
- The certificate course syllabus has been framed with **4 (Four) units** and with **Two credits**.
- The course will be conducted with **2 (Two) hours per week**.
- The course will be free of cost. **NO fee will be collected.**
- The duration of the course is decided to run for **30 working hours**.
- The BOS nominated **Dr.B. Adinarayana** as course Coordinator for the academic year 2023-24.

Hence, the principal is humbly requested to approve the proposal and issue the proceedings to start the course.

Members attended for BOS meeting:

1. Dr.B. Adinarayana, Lecturer i Botany 
Lecturer in Charge, Dept of Botany
2. Sri S.Bhaskar Rao, Lecturer in Botany 
3. Sri B.Nagesh Babu, Lecturer in Botany 

Certificate course in Hydroponics

Department of Botany

Government Degree College, Rajampeta- 516115 (AP)

(Re-Accredited by NAAC with "B" Grade in Cycle –II)

PROPOSAL -2023

1. Title of the course: Certificate course in Hydroponics
- 2 Eligibility: Intermediate/ Degree of any discipline
3. Importance/need of the Course:

Hydroponics is one of those underrated techniques where all these concerns can be maintained if the farmer is willing to take some initial risks and investment. So, it is clear that this is the time when our farming community should switch to modern terms and techniques from the conventional methods without thinking that the new is always unacceptable. It is time that the farmers should be encouraged to adopt Hydroponic system in every part of our country so that they get the exposure to explore.

HYDROPONICS is designed as certificate course according to the local needs and enrichment of the curriculum as follows;

- The topography of Kadapa district is in Semi arid zone of Deccan plateau. It receives low rain fall annually. The people of this area usually migrate to other areas during unseason for agriculture.
- But this area is potentially strong for horticulture and floriculture crops particularly ornamental crops.
- More and more Floriculture/pomiculture practices are essential in this area.
- Hydroponics includes farming of flowering and ornamental plants in soil less culture used for the growth of flowering and vegetable crops.
- Due to increase in domestic need of Vegetables and flower yielding plants, the career scope in the field of Hydroponics is also increasing.

- The need of hydroponic experts in nurseries, Botanical Gardens, farm companies, Genetic companies, Agricultural product companies.
- Aspirants may teach at the college and university level as a professor.

4. Target Group:

- ✓ All UG students of Govt Degree College, Rajampeta
- ✓ Any UG/PG students of nearby colleges of Rajampeta

5. Scope of the Course:

Hydroponics can offer wide ranging opportunities for business and career. This is an intensive and high tech way of growing flowers, fruit, vegetables and other crops. It does not require as much land as more traditional crop production; and it offers the possibility of producing crops for an extended period; perhaps even all year round. It does require a higher investment in equipment, and a greater level of technical knowledge than other forms of horticulture.

If you want to be involved in hydroponics, you either need to have the technical knowledge yourself, or be prepared to employ people and pay premium wages to people who have that knowledge.

6. Aim and Objectives of the Course:

This is to:

- Learn to grow plants commercially in hydroponics
- Learning about the equipment and materials used in both amateur and professional hydroponics
- Discover the nature and scope of this industry and the career and business opportunities it offers.
- Develop networking, resources, business and technical skills, building a foundation for success in the hydroponic industry.

7. Expected learning Outcomes of the course:

1. To provide a sound basis of knowledge in horticultural principles as they apply to the culture, use and management of plants in various production situations.

2. To provide new and existing employees who are unable to undertake on campus training with the opportunity to gain appropriate knowledge in the field of plant culture, use and management.
3. To prepare employees for supervisory and managerial positions in the field of plant culture, use and management.
4. To provide horticultural business owner/operators (or those contemplating ownership) with appropriate training to apply technical skills to the management of the physical, financial and human resources in which they have made, or will make, a substantial investment.
5. To provide an understanding of modern technology and its application to growing plants, with emphasis being placed on hydroponics production of commercially valuable plants.
6. This course will build a very broad knowledge, awareness and understanding of hydroponics. As a graduate, you will be well placed to understand and see opportunities in a much better way than you could before commencing the course.
7. This is an industry with huge potential. It is difficult for anyone to predict what your best opportunities might be, upon finishing your studies. The one thing that is certain is that they will be greater than before you started.

8. Course Design:

- a) Eligibility : **Intermediate/Any graduate**
- b) Course duration : **45 working hours**
- c) Fee particulars: **No fee**
- d) Resource persons : **All Botany faculty members**

9. Course Content

Syllabus

UNIT-I

1. Plant Growth Requirements – Light , Temperature, Nutrition- nutrient requirements, deficiencies, pH, growth regulators
2. Plant Growth Requirements –Hydroponic Growing Systems - basic concepts and designs, site considerations. Growing Media - types, properties, uses.
3. Hydroponic Nutrient Solutions - nutrient formulae, preparing solutions.
4. Hydroponic Equipment - componentry, nutrient delivery, pumping, testing
5. Growing Structures - Design and Construction – types

UNIT- 2

1. Plant Culture In Hydroponics A - trellising, pruning, pollination, transplanting.
2. Plant Culture In Hydroponics B.
3. Aggregate Culture.
4. Nutrient Film Technique (NFT) Culture 5. Rockwool Culture 6. Other Techniques - wick systems, flood & drain, bag culture, aeroponics, etc.

UNIT- 3

1. Irrigation - Soil Requirements 2. Irrigation Systems 3. Plant Propagation - seed & cutting propagation & tissue culture. 4. Market Gardening - Cut Flowers. 5. Market Gardening – Vegetables. 6. Other Plants In Hydroponics - herbs, grasses, indoor plants. 7. Pest and Diseases - Identifying the problem, pests and diseases in hydroponics. 8. Weeds - identification and control

2. NIT -4

1. Managing A Commercial Hydroponics Farm - crop scheduling & selection standards. 2. Management - Organisation and Supervision. 3. Marketing - Promotion and Selling 4. Special Project - Prepare a detailed report of at least 2,000 words, plus photos or diagrams, on a particular aspect of technology which you have studied that significantly assists growing.

Evaluation Process

After successfully completion of the course, the evaluation process is set for 50 marks. Out of them, **25 marks are set for theory** part with short answer questions (Multiple Choice questions and True or False). The other **15 marks are set for practicals** with procedural questions which include do's and don'ts to check the practical knowledge. **5 marks are set for attendance**. The total evaluation process will be as follows :

THEORY (25 marks)

SECTION – A

(Each question carries one mark)

I. Multiple Choice Questions ----- 15×1 = 15 marks

SECTION – B

(Each question carries one mark)

II. True /False Questions ----- 5×2 = 10 marks

Total= 25 marks

PRACTICALS(15 marks)

Procedural questions: **Do's and Don'ts**

EIGHT Questions will be given. Student is asked to write any **FIVE**. Each question carries **THREE** Marks

(Each question carries 3 marks) ----- 3×5 = 15 marks

VIVA-VOCE ----- = 10 marks

Total = 50 marks

Proceedings of the Principal, GDC, Rajampeta

Present: Dr. B. Purushotham Reddy, M.Sc., Ph.D.

The principal is pleased to greet the Staff members of Botany Department for starting a **"Certificate course in HYDROPONICS"** during this academic year 2023-24 and appointed Dr.B.Adinarayana as Course coordinator (Programme) along with Sri.S.Bhaskar Rao and Sri B.Nagesh Babu as Instructors.

As per the resolutions in BOS meeting held on 25.10.23. in the Department of Botany, The Principal has hereby directed the course coordinator to give wide publicity and issue notification for the admission of students and other citizens in and around Rajampeta (those who are interested) to take admission in to the course.
