The governments of 46 countries across the globe signed the "Montreal Protocol on Substances that Deplete the Ozone Layer" in 1987, and this was done to celebrate this event. <p>Significance</p> <ul style="list-style-type: none">● The ozone layer present in the Stratosphere, absorbs most of the sun's UV radiation and reduces the amount of radiation that reaches people. The ozone layer is crucial because radiation is a known cause of cancer, cataracts, and other health problems.● Man-made chlorofluorocarbons are among the most major ozone layer killers.● To provide awareness to the students Dept. of Zoology has conducted "World Ozone Day" on 16-09-2025.● The theme for World Ozone Day 2025 is "From Science to Global Action". theme highlights the journey from scientific research that identified the threat of ozone depletion to the international cooperation and policy-making that led to effective global actions, like the Montreal Protocol, resulting in the ozone layer's slow healing.● Sri. K. Venkata Narasaiah, I/C Principal said that the Ozone layer is mainly damaged by the over utilization of Refrigerators, Propellents, CFC's.● Faculty of Zoology Dr. N. Chandra Mohan, B. Sujatha, S.
